

CamelTrunk – Free vs Premium & Trunk Assist Functionality

Developer + Operations Specification | V1 Membership & Shopping Workflow

1. FINAL PREMIUM BENEFITS

Premium is for regular CamelTrunk users. Benefits should be automatic, visible and simple.

Feature	FREE PLAN	PREMIUM PLAN
Trunk ID	Included	Included
Storage	Standard Free-plan rules	Premium storage benefits/rules
Trunk Assist	Standard service charge	25% OFF CamelTrunk service charge
Local delivery	Actual charge	Actual charge; no 25% discount
International shipping	Standard pricing	5% OFF eligible shipping charge
Consolidation	Standard paid rate	FREE
Basic packing	Standard paid rate	FREE
Other basic services	Standard charges	FREE where configured as a Premium benefit
Priority Trunk Assist	Standard queue	Priority processing
Customer support	Standard	Priority support
Member offers	No	Yes

2. DISCOUNT BOUNDARIES

25% Trunk Assist discount: applies only to CamelTrunk's service charge. It does not apply to product value, local delivery, taxes, store charges, alteration charges or other third-party expenses.

5% shipping discount: applies only to the eligible CamelTrunk shipping charge. It does not apply to customs duty, destination taxes or other third-party charges unless explicitly configured.

FREE consolidation/packing/basic services: configure each eligible service explicitly. Do not make third-party expenses free.

3. ACCOUNT TYPE & STORAGE INDICATIONS

Location	FREE ACCOUNT	PREMIUM ACCOUNT
Dashboard	FREE badge + Upgrade to Premium	PREMIUM badge
Trunk page	Show Free storage status/days + Upgrade CTA	Show Premium storage status/days
Storage charges	Show standard rate + Upgrade CTA	Show Premium rate/benefit
Before expiry	Countdown + Premium saving message	Countdown + member benefit
After expiry	Current daily charge + Upgrade CTA	Premium daily charge/benefit

Developer rule: account type must be visible wherever storage charges are displayed.

4. FREE-TO-PREMIUM UPSELL PLACEMENT

Page / Area	Recommended functionality
Dashboard	Contextual Premium banner: save on Trunk Assist, shipping and eligible services.
Trunk / Storage	Show Premium storage benefit + Upgrade.
Trunk Assist landing page	Show standard fee and Premium saving: "Premium saves 25%."
Each Trunk Assist card	Show standard service fee and Premium service fee where practical.
Quotation screen	Show standard fee, Premium discount and final fee.

Page / Area	Recommended functionality
Shipping quotation	Show 5% Premium saving + Upgrade for Free users.
Consolidation / Packing	Show "FREE with Premium" where applicable.
Checkout	Show Upgrade before payment when an upgrade changes eligible pricing.
Account / Profile	Permanent Premium upgrade option.

Use contextual, non-blocking upsells. Do not show aggressive pop-ups on every page.

5. WHERE TO DISPLAY TRUNK ASSIST PRICES

Customers should see CamelTrunk's service charges before submitting a request, wherever the price can be determined.

Location	Display
Trunk Assist main page	Service categories + standard/starting fee + Premium saving.
Individual service page	Exact service-charge rule, inclusions/exclusions and examples.
Request form	Applicable service-charge information box.
Quotation	Product cost + local delivery + service charge + Premium discount + total.
Checkout	Final payable amount + refundable/non-refundable components.
Order history	Original charge + discount + paid amount + refund status.

6. WHEN TO COLLECT MONEY FOR TRUNK ASSIST

Separate **service charge** from **product value** and **third-party costs**. For sourcing services, do not purchase before customer approval and successful payment.

Service	Before research	After quote / approval	Execution
Product Link	No purchase payment.	Collect product value + local delivery + service charge.	Purchase after payment.
Image / Cart Screenshot	No purchase payment.	Research; then collect product value + local delivery + service charge.	Purchase after payment.
Local Shop	Normally no payment before confirmation.	Collect confirmed product value + local delivery + service charge.	Purchase after payment.
Boutique / Alteration	Requirements first.	Collect confirmed product + alteration + local delivery + service charge.	Proceed after payment.
Custom Request	Request details first.	Quote after feasibility; collect approved order value + service charge.	Proceed after payment.

7. REFUNDABLE vs NON-REFUNDABLE

Component	Default	Rule
Product value; purchase not made	REFUNDABLE	Refund if funds have not been committed and cancellation is allowed.
Local delivery; not incurred	REFUNDABLE	Refund if seller/courier has not charged it.
Product already purchased	NOT automatically refundable	Subject to seller's cancellation/return/refund policy.
Trunk Assist service charge after meaningful work	NON-REFUNDABLE	Research, sourcing, availability checking or quotation work has been performed.
Service charge before work starts	REFUNDABLE where allowed	If no paid work has started and policy permits cancellation.
Third-party costs already incurred	NON-REFUNDABLE	Actual external charges already incurred are deducted.
Eligible unused balance	REFUNDABLE	Return remaining eligible amount after deductions.

Final Terms & Conditions should define exact cancellation windows, seller-dependent refunds and exceptional cases.

8. RECOMMENDED PAYMENT WORKFLOW

Step	Customer sees	System action
1. Request	Request received.	Create request; identify Free/Premium.
2. Research	Researching / sourcing.	Record product availability and costs.
3. Quote	Item + local delivery + service fee + discount + total.	Lock quote for validity period.

Step	Customer sees	System action
4. Approval	Approve / Reject.	If rejected, apply cancellation rule.
5. Payment	Final payable amount.	Collect before purchase.
6. Purchase	Order in progress.	Record seller invoice/order ID.
7. Parcel received	Parcel added to Trunk.	Update inventory.
8. Shipment	Shipping + Premium discount.	Collect shipping payment before dispatch.

9. PREMIUM CALCULATION

Premium Trunk Assist fee = Standard Trunk Assist fee × 75%.

Example: ■500 standard service charge → ■125 discount → ■375 Premium service charge. Local delivery and product value remain unchanged.

10. DEVELOPER NOTES

Function	Requirement
Membership flag	Every account has FREE or PREMIUM status.
Automatic pricing	Apply eligible benefits automatically; no coupon required.
25% Trunk Assist	Only the CamelTrunk service-charge component.
5% shipping	Only eligible shipping-charge component.
Free services	Eligible line items become ■0 and show "Premium benefit".
Quotation	Show original amount, discount, final amount and excluded charges.
Price lock	Approved quotation retains price for stated validity period.
Upgrade recalculation	If Free user upgrades before payment, recalculate eligible charges.
Refund engine	Store components separately for accurate refunds.
Audit trail	Store original fee, discount, payment, refund and reason.

11. CUSTOMER-FACING COPY

Free: "Use CamelTrunk with standard pay-as-you-go pricing."

Premium: "Save 25% on Trunk Assist service charges, 5% on eligible shipping charges, and enjoy FREE consolidation, packing and selected basic services."

Important: "Premium discounts apply to eligible CamelTrunk charges only. Product prices, local delivery, customs, taxes and other third-party charges are excluded unless stated otherwise."

12. V1 IMPLEMENTATION CHECKLIST

- Create FREE and PREMIUM account types.
- Show account badge on dashboard and relevant service pages.
- Use a central pricing engine instead of hard-coded prices on individual pages.
- Show standard price and Premium saving wherever applicable.
- Apply 25% Trunk Assist discount automatically.
- Apply 5% eligible shipping discount automatically.
- Set eligible consolidation, packing and basic services to FREE for Premium.
- Show quotation breakdown: original fee, discount, final fee.
- Separate product value, local delivery and CamelTrunk service fee.
- Implement refundable/non-refundable status by component.
- Add contextual Upgrade to Premium CTAs for Free users.

- Recalculate eligible charges after Premium upgrade before payment.

- Record payment/refund history.

Final principle: Premium should be valuable for frequent users while protecting CamelTrunk margins. Apply discounts only to CamelTrunk-controlled revenue and make every charge transparent.
